CBC.E Portable Edgebander

The CBC.E Edgebander is designed for convenience, portability, and affordability. It is a hot melt glue applicator for use on PVC, ABS, paper, and wood veneer edgebanding that is not pre-glued. A spiral glue bar raises the glue from the glue pot and flows back down, similar to a fondue fountain. Maximum edgebanding thickness is 3mm and up to 3" wide. It has an integrated manual cutter, a digital temperature control (adjustable from 120° to 220°C), and electronic speed regulator. The required glue works in the range of 150°C to 180°C. The glue pot comes with 1.5LB of glue, the glue pot capacity, and heats in 15 minutes.

RBB.1000 Edge Trimmer Machine

The RBB.1000 Edgetrimmer is a portable benchtop edge banding trimmer for use on PVC, ABS, paper and wood veneer edgebanding. Manually feed a banded panel through the powered cutting unit to produce a horizontal cut, a vertical cut, and a clean scrape edge all in one step. The scraper block finalizes the cut with a slightly rounded edge for a professional and smooth finish. Flip the panel for a second pass and you're done. The maximum workpiece thickness is 2-3/8". It weighs less than 42 lbs. and easily installs virtually anywhere.
